

Claims

[c1]

Sub A7

1. A scrubbing, buffing machine comprising:
 - (A) a frame;
 - (B) a first scrubber attached to said frame;
 - (C) a buffer attached to said frame;
 - (D) a squeegee attached to said frame, behind said first scrubber and in front of said buffer; and
 - (E) a motor means, mounted on said frame, providing power to said first scrubber and said buffer.

[c2]

2. A scrubbing, buffing machine, as recited in claim 1, wherein said motor means is an engine.

[c3]

3. A scrubbing, buffing machine, as recited in claim 1, further comprising a second scrubber attached to said frame and powered by said motor means.

[c4]

4. A scrubbing, buffing machine, as recited in claim 2, further comprising a vacuum powered by said engine and in communication with said squeegee for collecting refuse fluid.

[c5]

5. A scrubbing, buffing machine, as recited in claim 2, further comprising a first drive wheel and a second drive, each in mechanical communication with said engine.

[c6]

6. A scrubbing, buffing machine, as recited in claim 1, further comprising a first and a second stability wheel attached to said frame.

[c7]

7.A scrubbing, buffing machine, as recited in claim 1, further comprising a control panel mounted on said frame for providing user controls.

[c8]

8.A scrubbing, buffing machine, as recited in claim 1, wherein said frame is made of steel.

[c9]

9.A scrubbing, buffing machine, as recited in claim 1, wherein said first scrubber further comprises:

(1)a first scrubber pad;

(2)a first gear box.

[c10]

10.A scrubbing, buffing machine, as recited in claim 3, wherein said second scrubber further comprises:

(1)a second scrubber pad;

(2)a second gear box.

[c11]

11.A scrubbing, buffing machine, as recited in claim 1, wherein said buffer further comprises:

(1)a buffer pad;

(2)a gear box.

[c12]

12.A scrubbing, buffing machine, as recited in claim 1, wherein said squeegee further comprises:

(1)a squeegee mount fixed to said frame, and

(2)a squeegee blade attached to said squeegee mount.

[c13]

13. A scrubbing, buffing machine, as recited in claim 2, wherein said engine is selected from the group of engine types consisting of propane engines, gasoline engines, electric motors and battery powered motors.

[c14]

14. A scrubbing, buffing machine, as recited in claim 2, wherein said engine further comprises:

(1) a fuel tank attached to said frame;

(2) an internal combustion engine receiving fuel from said fuel tank;

(3) a vacuum / blower in mechanical communication with said internal combustion engine;

(4) an exhaust cooling chamber receiving exhaust from said vacuum / blower to cool exhaust from said internal combustion engine;

(5) an electric clutch in mechanical communication with said internal combustion engine;

(6) an alternator in mechanical communication with said internal combustion engine; and

(7) a battery in electrical communication with said alternator.
